PROFILE

I'm a software developer with a background in mathematics and physics.

My journey in computer science started during my time at UCT, and, well, the rest is history :)

KEY SKILLS

- Languages: C#, Python, JavaScript, Typescript, SQL, Rust (learning)
- Operating Systems (in order of preference): Linux, Mac, Windows
- Tools: Vim, Git, Azure DevOps, Docker, Kubernetes, OpenAI
- CloudOps: Azure, AKS, Confluent Cloud, Cosmos
- Frameworks: .NET, Angular, IONIC, Node.js, Vue, Dapr, Kafka, RabbitMQ, d3.js, LangChain, LangGraph, SemanticKernel
- Databases: PostgreSQL, MySQL, MSSQL, Couchbase, Cosmos, Mongo, SQLite

KEY ACHIEVEMENTS

- Architect & Lead Developer of Mandy (Project Metrics), a productivity tool used to track the progress of projects at Derivco, and provide visualizations.
- Architect & Lead Developer of APC (Auto Promo Creation), using generative AI to build full, production worthy, solutions.
- Lead Developer of Campaign Manager, a player retention tool at Derivco.
- Contributed to TOMS (Train Operating Management System) for Metrorail.
- Created a game initiative for combating English illiteracy using Python and the VPython physics engine.
- Lead developer of DMOCC-IS, an incident reporting system for Metrorail.
- Lead developer of a collaborative XBOX RPG game involving City Varsity animators and UCT developers.

PERSONAL PROJECTS

I like developing productivity tools and frameworks.

Here are some of my favorites:

(oh, and the READMEs need some love, so please don't judge :P)

- ASQ, real-estate property web app. for people to provide "micro services" in renovating their homes. Stack: Angular, .NET, MySQL, Zoom, Node.js. [link](#).
- TaskTree, a framework for building and executing complex workflows. Stack: .NET. [link](#).
- F4Lang, a agentic workflow orchestration framework, based on TaskTree. Stack: .NET, SemanticKernel, Dapr. [link](#).

- DevOps CLI: tool for automating the creation of Work Items, Queries, and Dashboards in Azure DevOps. Stack: .NET, Azure DevOps API. [link](#).
- LangChain Lab: a personal "laboratory" for experimenting with LangChain, LangGraph and OpenAI. Working on codegen graph that generates a solution, from architecture blueprints to code. Stack: C4, LangChain, LangGraph, OpenAI, Python. [link](#).

EMPLOYMENT EXPERIENCE

Derivco (Senior Developer) - 2022 to present

Derivco (Intermediate Developer) - 2019 to 2022

Healthbridge (Full Stack Developer) - 2017 to 2019

- Evolved and maintained healthcare systems - Contributed to iHealth, SASA, ASSM projects, to name a few.
- Primarily used ASP.NET, MVC, MSSQL, AngularJS, Kendo, Telerik and vanilla JS.

InfoSys Software Solutions (Full Stack Developer) - 2014 to 2017

- Built and maintained web applications for various clients. Including large scale government projects, like Metrorail and TOMS (Train Operating Management System).
- Developed web applications using ASP.NET, MVC, AngularJS, MSSQL, and more. - Collaborated in an Agile development environment.

EDUCATION

University of Cape Town (2011 - 2013)

BSc in Computer Science and Computer Game Development (incomplete)

INTERESTS

Cycling, running, gym, yoga, mathematics, physics, skateboarding and coding.
